**Location:** Ho Chi Minh City, Vietnam

## Brief Introduction

Hi, I'm a front-end developer who can code all day without getting tired.

I began my journey in frontend development through self-learning and personal projects. Over time, I gained experience working at two companies as a Frontend Developer, building real-world web applications.

In the past year, I have been very focused on learning front-end web programming. Now I am very confident that my abilities can meet your requirements.

## Work Experience

### Frontend Developer

**MST Entertainment** · May 2024 – Jun 2025

MST Entertainment is a startup in Vietnam building web platforms and interactive tools for the entertainment industry.

I joined the company as a Frontend Developer, working with React and Next.js to develop scalable and responsive user interfaces. The products I worked on include interactive engagement tools, booking systems, and link-in-bio style web pages. I contributed to building reusable components, improving UI consistency, and optimizing performance, achieving approximately 25% faster page load

times. I also helped establish team-wide code standards using ESLint, Prettier, and EditorConfig to improve code quality and streamline code reviews.

The main technologies used include JavaScript, TypeScript, React, Next.js, NestJS, and MongoDB.

## Frontend Developer Intern

**NCC Plus** · Jun 2023 – Sep 2023

NCC Plus is a software outsourcing company in Vietnam specializing in web and enterprise solutions.

I joined NCC Plus as a Frontend Developer Intern, where I learned core frontend concepts and worked on internal projects using React. I focused on converting UI designs into reusable React components, integrating REST APIs, and following clean code principles and Git workflows. I also participated in code reviews and technical research to improve code quality and development practices.

The main technologies used include React, JavaScript, REST APIs, and Git.

## Projects

### PetCare – Pet Care & Booking Management System

**Type:** Frontend-heavy Full-stack Project

**Tech:** React, TypeScript, Tailwind CSS, Shadcn UI, Zod, React Query, Node.js, MongoDB

**Key features:**

- Real-world booking workflow with multiple statuses
- Role-based access control (Admin / Employee / Customer)
- Employee scheduling with override logic
- Clear separation between UI, business logic, and API layers

**Website:** <https://petcare.thuannguyen2kx.site/>

**GitHub:** <https://github.com/thuannguyen2kx/pet-care>

Flagship project demonstrating product thinking and complex business logic handling.  
Detailed description available in my portfolio.

### Liteshop – Frontend E-commerce Application

Frontend clone of an e-commerce user interface with production-level practices.

**Tech:** React, TypeScript, Tailwind CSS, React Query, React Hook Form, Yup, Vite, Vitest, Storybook

### Highlights:

- JWT authentication with automatic token refresh
- Advanced filtering, pagination, and product search
- URL-synced state for shareable results
- Code splitting and build optimization
- SEO with React Helmet
- Public / private route separation
- Unit testing and component management with Storybook

**Website:** <https://liteshop-sigma.vercel.app>

**GitHub:** <https://github.com/thuannguyen2kx/liteshop>

## Skills

### Programming Languages

- JavaScript, TypeScript

### Frontend

- React, Redux Toolkit, React Query, Zod, Zustand
- Tailwind CSS, Sass
- Axios, Vite, Vitest
- HTML5, CSS3, SEO

### Backend & Infrastructure

- REST, HTTP(S)
- Node.js, JSON Server
- Vercel, Render, VPS

### Tools

- Git, GitHub, Postman
- Lighthouse, React DevTools, Redux DevTools
- Figma, VS Code, Bash

# Honors & Awards

- End-of-term Scholarship (2024)
- Academic Scholarship (2022 – 2023)
- First Semester Scholarship (2021 – 2022)

# Education

## Software Engineering

Hanoi University of Industry (HaUI) · 2021 – 2025

# Languages

- **English:** Able to read and understand technical documentation
- **Vietnamese:** Native

# Notes

I value:

- Clean code and clear structure
- Strong understanding of business requirements
- Continuous learning and improvement

I am looking for an environment where I can grow through **real projects, mentorship, and team collaboration**.

Thank you for your time — Nguyen Thanh Thuan
